(1)its (2)which (3)whose (4)that

三、克漏字測驗【請依照段落上下文意，選出最適當的答案】

In the world of marketing, new strategies are used to promote and to sell. Many sponsors of movies, TV drama, and other shows now use the strategy of product placement— 11 products into the show's plot and setting. Business sponsors believe that by doing so, they can link their brands to likeable characters in the show. For TV networks and movie companies, product placement is great because it costs very little while earning significant income to help 12 their shows and films.

Product placement can take many forms. Sometimes it's readily apparent, 13 in other cases, it is more subtle. The product does not even have to fit the theme of the show. A movie or TV character might check email on a Apple computer and then sit at a breakfast table with a box of Kellogg's Corn Flakes. As long as the character is played by popular actor/actress, the coffee s/he drinks, the accessories s/he wears, the mobile phone s/he uses, and the car s/he drives can catch the attention of the viewers, who will soon become 14 buyers of these products. In a viewer's mind, buying and using the same product creates a sense of belonging. It is a statement of life style, a 15 of image and value, and a sense of satisfaction toward their life, the one that is like their favorite show character's. It is not surprising that product placement is one of the most effective promotional means.

- (4)11. (1)ridiculing (2)replacing (3)competing (4)inserting
(2)12. (1)concede (2)subsidize (3)minimize (4)retreat
(3)13. (1)despite (2)rather than (3)whereas (4)instead
(3)14. (1)hostile (2)repulsive (3)potential (4)stagnant
(1)15. (1)symbol (2)stain (3)slaughter (4)smirk

四、閱讀測驗【請依照段落上下文意，選出最適當的答案】

When tens of thousands of 15-year-olds worldwide sit down at computers to take the Program for International Student Assessment (PISA) examination this fall, they will be tested on reading, math and science. They will also tackle a new and controversial series of questions designed to measure “ collaborative problem solving skills. ” Instead of short-answer questions, the test taker will record outcomes of games, solve jigsaw puzzles and perform experiments with the help of a virtual partner that the test taker can communicate with by typing in a chat box. Although the new test domain is still experimental, PISA officials believe the results from these novel problems will push governments to better equip their young people to thrive in the global economy.

Since the PISA exam was first rolled out in 2000, it has measured a student's ability to use reading, math and science in real-life settings. The PISA rankings became a flashpoint for policy makers concerned about international competitiveness. Three years ago the PISA exam decided to add questions that were supposed to **ferret out** the problem-solving abilities of 15-year-olds around the globe. (PISA says Chinese students are good problem solvers. Israelis, not so much. Americans fall somewhere in the middle.) The test framers believe that the global economy today and in the future requires an even more specific set of skills—group problem solving mediated by the Internet. This year PISA will have students in 51 countries put collaborative problem solving under the microscope.

Given the pace of technological innovation, schools must adapt, and the new domain gives schools a road map to do that, says Jenny Bradshaw, senior PISA project manager, who oversees the test: “ Working with unseen partners, especially online, will become a bedrock skill for career success. Increasingly, this is the way the workplace and the world will function. ”

(1)16. Which of the following is the best title for the above passage?

- (1) Testing for Group Problem Solving Competence
- (2) Testing for New Technology Subjects
- (3) PISA Heading toward New Digital Testing
- (4) PISA's Academic Subject Tests

(4)17. According to the passage, why did PISA introduce the new type of test?

- (1) To compare testing abilities of young people in different countries.
- (2) To help education policy makers develop better testing systems for their students.
- (3) To determine the level of international competitiveness and use it as a reference for global investment.
- (4) To make sure younger generations can be prepared with the ability needed in the global economy.

(3)18. The phrase “ **ferret out** ” in the second paragraph is closest in meaning to _____.

- (1) forfeit
- (2) override
- (3) discover
- (4) conceal

(2)19. Which of the following statements about PISA is **NOT** true?

- (1) Policy makers worldwide use PISA rankings to examine their country's future competitiveness.
- (2) PISA aims to commercialize its tests to make education a lucrative commodity.
- (3) Group problem solving training is gaining its momentum and will be driving young people's future.
- (4) Working with people from different places will be an essential skill for global success.

(3)20. In what way is the new test introduced by PISA significant?

- (1) The new test drives countries with great economic power to cultivate students' math competence.
- (2) The new test may help American students learn more and better.
- (3) Problem solving and global collaboration are considered critical for students' international competitiveness.
- (4) A student's abilities to use reading, math and science are no longer important and need not be tested.
