四、閱讀測驗【請在下列各題中選出最適當的答案】

第一篇：

He fought with distinction and held almost every major office in Britain. He commanded a country in the midst of world war and is credited with inventing the social safety net. He has been called a war lover, a drunk and a racist. He won the Nobel Prize for Literature, rivaled only Shakespeare in his abundant literary output, and painted more than 500 drawings in his lifetime.

Winston Churchill was a complex and contradictory leader unlike any in recent history. And he also presents one of the most sought-after and challenging roles for any actor worth his pay.

“ Not only could he pitch, but he could bat and run. ” Gary Oldman said in a recent interview. “ He is the ultimate all-rounder. ”

Oldman, a talented British actor, takes on Churchill in the movie “ Darkest Hour ” . The movie, directed by Joe Wright, describes the defining 28 days in 1940 when Churchill was made prime minister and finally convinced Britain to fight Hitler. The film is an often tense character study, exposing Churchill's own moments of self-doubt and the resistance he faced from the public, his party and his king.

Countless movies have been made about Churchill, but Wright was drawn to this particular period because of what that uncertainty revealed the man. Churchill has become such an icon that he's either untouchable or he's a demon. Wright's appeal was to take Churchill out from his shrine and not throw him into the toilet but look at him eye to eye as a human being.

The movie also tries to understand Churchill through his use of language, with the sound of typewriters constantly clacking in the background. “ They are the most iconic speeches in the history of the English language and they were all written in 28 days, ” Wright said. “ So how these speeches came to be and how he came to express the will and the sentiment of the nation is really the subject, ” Wright added.

The latest in technology for apartments encourages residents not to lift a finger, except maybe to touch their phones. Developers are certain that buyers want gadgets that could, say, help shuffle boxes of books to storage areas, or allow a peek inside the refrigerator when they're at the grocery store and can't remember if they need milk.

These digital amenities, which are controlled by voice commands and smartphone apps, are becoming available across the New York area in condos and rentals. But these gadgets are not free. Users may have to pay a large amount of money to get the gadgets. Users may also feel troubled when these amenities occasionally stop functioning well.

But, to not plug in would be to lose out. "It is not about the future," said Elena Ashkinazy, a real estate manager at Time Equities, which has listed a " **smart apartment** " on the Upper East Side of New York City for its digital features. This apartment includes a fridge that has three built-in cameras that are accessible remotely. "The time is now," she said, "and we have to be up-to-date."

The latest offering of cutting-edge features includes an all-in-one furniture system designed to save space by expanding or contracting at the flick of a switch. It is available in rental projects in New Jersey and Manhattan. Renters in the projects are given the option of leasing a **telescoping** bed-and-dresser system designed by Ori Systems.

At night, renters can slide out a hidden bed, by manually pressing a switch, tapping their phone, or through voice-assistant software. In the morning, the bed can retreat to the Ori unit, which is plugged into a wall, allowing a larger living space for entertaining. The unit, lined with hanging rods and drawers, is made of poplar plywood and also has a surface that can be extended for a desk.

Ori is expected to be most popular with renters of small studios. The technology could help avoid the hassle of folding sofa beds every morning, though it still may have to work out some imperfections. Renters would likely pay an extra \$350 a month for an Ori unit.

(2) 46. Which of the following would be a proper title for this passage?

- (1) The Newest Skyscrapers in New York

(4) 48. Which one of the following is **true** about the " **smart apartment** " ?

- (1) The owner or renter must be a genius.
- (2) It must not have any furniture.
- (3) Each unit is equipped with a telescope.
- (4) It offers digital amenities like a fridge with cameras.

(3) 49. According to the passage, which of the following statements is **true**?

- (1) Ori's bed-and-desk system is free.
- (2) ' Smart apartment' is not available in New Jersey.
- (3) An Ori unit can be plugged into a wall to save space.
- (4) Elena Ashkinazy is a sales lady of Ori.
